

WorldClassRoom (Canvas)

How can I use or view my rubrics when using Turnitin?

Issue

Rubrics (on Assignments and viewable in SpeedGrader) can still be used with Turnitin enabled but they will not appear below the assignment, as in the previous version of the integration.

If you already have a rubric set up for the assignment, it can be viewed and edited by either going to **Outcomes** in the Course Navigation...

.....or just viewed and used within SpeedGrader.

If you do not already have a rubric attached to the assignment, you should take off Turnitin from that assignment, set up the rubric, then re-enable Turnitin.

Canvas has created several very useful guides for creating and managing Turnitin
